# Financing Critical Power Solutions Using C-PaaS

**EcoPowerSupplies has launched a new way for datacentres to invest in uninterruptible power supplies and protect their operations from a worsening UK electrical supply grid. Standing for ‘Critical Power as a Service’, the C-PaaS model allows organisations to spread the cost of power protection investments including UPS systems and standby power generators over a fixed term. Optional maintenance costs, future battery replacements and system upgrades can also be included, in addition to any initial project and electrical installation works.**

For an 80kVA [modular uninterruptible power supply](#) and matching standby power generator, Critical Power as a Service can cost as little as £400 per month over a five year term. At the end of the fixed term, the client can choose to extend the lease, purchase the installed kit or upgrade to a newer, higher efficiency system. For an 80kVA UPS system, datacentres would typically have to make an upfront investment from £20,000 and fund future maintenance, repair and replacement costs. Other benefits of Critical Power as a Service include a lower Total Cost of Ownership and potential tax reductions.

“We launched critical power as a service to match how clients are financing their software applications. Many now use the SaaS model renting ‘Software as a Service’. We believe the same can be applied to critical power” commented Robin Koffler, co-founder of EcoPowerSupplies. “Clients are impressed with the flexibility of C-PaaS on their budgets and power protection strategy.”

The C-PaaS model is ideal for purchasers of modular UPS systems including the Huawei UPS5000E series, available from 40kW to 1MW. The UPS5000E can be capacity upgraded by adding additional power modules to meet growing demand for uninterruptible power. Under C-PaaS the additional modules can be added during the lease term.

To arrange a Critical Power as a Service quotation, contact EcoPowerSupplies on 0800 210 0088 or visit [www.EcoPowerSupplies.com/critical-power-leasing](http://www.EcoPowerSupplies.com/critical-power-leasing).

EcoPowerSupplies is exhibiting at Data Centre World 2015 (11 – 12 March, ExCeL, London) on stand E02 (Thamesgate Group).

**About EcoPowerSupplies**

EcoPowerSupplies is a specialist independent supplier of eco-friendly uninterruptible power supplies, standby power systems and renewable power solutions. With its extensive power protection and energy saving experience the company helps organisations to implement secure power continuity plans, save energy and reduce their electricity and operating costs.

As a manufacturer independent supplier EcoPowerSupplies can ensure it delivers the right solution to meet a client's needs based on the extensive industry knowledge and experience of its personnel. With its own in-house NICEIC-certified electrical contracting, engineering and manufacturing teams, EcoPowerSupplies also provides a unified approach to project management reducing project costs and ensuring power protection projects are delivered on time.

EcoPowerSupplies also provides a 24/7 UK-wide, rapid-response maintenance and technical support team and remote monitoring via its own web-based system.
